

Jordan Patel

Manchester, United Kingdom | jordan.patel@example.net | 07700 900456

Summary

Software engineer focused on Python back ends and data platforms. Six years building APIs, event pipelines and the tooling around them. Comfortable owning a service from design to on-call.

Experience

Backend Engineer, Fabrikam Payments, Manchester (2022 to now)

- Designs and runs FastAPI services handling card authorisations; p99 latency down 35 percent after a caching redesign.
- Moved batch reconciliation onto Airflow with typed, tested tasks; failures now page the right team.
- Introduced contract tests between six services.

Software Engineer, Proseware, Salford (2019 to 2022)

- Django and PostgreSQL product for school timetabling; led the move to containers on Kubernetes.
- Wrote the CI pipelines (GitHub Actions) and cut build time from 25 to 8 minutes.

Skills

Python, FastAPI, Django, PostgreSQL, Redis, Kafka, Airflow, Docker, Kubernetes, Terraform, AWS, GitHub Actions, observability (Prometheus, Grafana), mentoring.

Education

MEng Computer Science, University of Manchester.

Looking for

Senior Backend or Data Engineer roles in Greater Manchester or remote, permanent, from 60,000 GBP.
